## VARIETIES RIPENING BEFORE HILEY

### ✓ **MAYBELLE (N. J. 164)**

A medium to large, white-fleshed peach ripening a few days before Sunrise and about one week before Red Bird. It is as hardy or hardier than Elberta. It is of good quality for such an early peach. It is a semi-cling under most conditions and as firm as other very early varieties.

### ✓ **SUNRISE (N. J. 133)**

An attractive, yellow-fleshed peach of medium size ripening a few days before Early East and Red Bird. It is firm and almost a freestone when ripe. It is resistant to bacterial spot.

### ✓ **CHERRYRED (N. J. 129)**

A large, round, non-melting, yellow-fleshed clingstone which ripens a few days before Red Bird. The flesh is orange-yellow, deeply stained with red. It can be picked and handled much the same as Red Bird. This variety is essentially an early, attractive yellow-fleshed Red Bird.

### ✓ **EARLY EAST (N. J. 134)**

A medium to large, yellow-fleshed peach. It ripens about ten days before Golden Jubilee. The fruit develops red color while still firm and in long distance shipping condition. The dormant fruit buds are hardier than Elberta. It has hardiness, productiveness, and good quality.

### ✓ **JERSEYLAND (N. J. 135)**

This large, firm, attractive, yellow-fleshed freestone ripens a week before Golden Jubilee. It hangs well to the tree, and is an excellent shipper. The tree is hardy, sets fruit buds freely, and comes into bearing early.

### ✓ **RARITAN ROSE (N. J. 97)**

A firm, attractive, white-fleshed freestone of good quality, ripening a few days before Golden Jubilee. The tree is vigorous, hardy, and productive. The best early white for the roadside trade.

### ✓ **WILDROSE (N. J. 118)**

The best white-fleshed freestone to follow Raritan Rose. The fruit is large, round oval, well colored with red, and has a clear white flesh of high quality.

### ✓ **TRIOGEM (N. J. 70)**

A firm, yellow-fleshed freestone of high quality, ripening two to three days later than Golden Jubilee. Very attractive and a good shipper. An excellent commercial variety to follow Jerseyland.

### ✓ **NEWDAY (N. J. 79)**

A firm, bright, attractive, yellow-fleshed peach of good quality, ripening with Triogem. It is larger than Triogem and resistant to bacterial spot.

### ✓ **SUNHIGH (N. J. 82)**

A large, firm, attractive, yellow-fleshed variety of good quality ripening a few days earlier than Goldeneast. A popular commercial variety. Not recommended for planting where bacterial spot is severe.

### ✓ **REDROSE (N. J. 98)**

A firm, highly colored, white-fleshed freestone of high quality ripening with Goldeneast. The trees are vigorous, productive, and hardy.

## MID-SEASON VARIETIES

### ✓ **GOLDENEAST (N. J. 87)**

A very large, firm, attractive, yellow-fleshed freestone of high quality ripening about two weeks before Elberta. An excellent variety to follow Sunhigh.

## ORDER BLANK

Date....., 19

To THE NEW JERSEY PEACH COUNCIL, INC.,  
R. F. D. No. 3, Princeton, New Jersey:

I would like to place an order for the following trees:

<i>VARIETY</i>	<i>No. Trees</i>	<i>Grade Preferred</i>	<i>VARIETY</i>	<i>No. Trees</i>	<i>Grade Preferred</i>

### **SUMMERROSE (N. J. 101)**

The best large, oval, white-fleshed freestone to follow Redrose in New Jersey. The fruits resemble well-colored Belle of Georgia in shape and appearance, but are firmer, larger, and earlier.

### **SUMMERCREST (N. J. 94)**

A large, oval, yellow-fleshed freestone ripening just before Elberta. A popular home canning peach. The tree is vigorous and hardy. An excellent variety to precede Elberta.

### **M. A. BLAKE (N. J. 117)**

A large, attractive, yellow-fleshed freestone ripening a week before Elberta. The flesh is very firm and the fruit hangs well after it becomes highly colored. It is as hardy as Elberta. Bright, firm and attractive.

### **WHITE HALE (N. J. 63)**

A large to very large, white-fleshed freestone of good quality ripening with J. H. Hale. The tree is more vigorous than J. H. Hale and the flowers are perfect. It meets the demand for a large, showy, white-fleshed peach during the Elberta season.

## **VARIETIES RIPENING AFTER ELBERTA**

### **AFTERGLOW (N. J. 84)**

A large, high quality, yellow-fleshed freestone ripening immediately after Elberta. The trees are vigorous, hardy, and productive. An excellent variety to prolong the Elberta season. Susceptible to bacterial spot.

### **LATEROSE (N. J. 109)**

This is a white-fleshed freestone ripening a few days after Elberta and White Hale. Hardy, productive and attractive. It has high quality for canning and freezing as well as for slicing fresh.

### **GOODCHEER (N. J. 152)**

A large, bright, attractive, yellow freestone of good quality, ripening about a week after Elberta. A promising variety to prolong the Elberta season. Susceptible to bacterial spot.

### **CONSTITUTION (N. J. 161)**

A large, yellow-fleshed, freestone of high quality ripening a week to ten days after Elberta or about with Goodcheer. It rates high for canning.

### **FALLATE (N. J. 183)**

An attractive, white-fleshed freestone peach of high quality and good size, ripening a week to ten days after Elberta or about with Goodcheer and Constitution. It is a promising white peach to follow Laterose.

### **AUTUMN (N. J. 145)**

The latest, large, yellow freestone, ripening fully ten to fourteen days after Elberta. Later than Rio-Oso-Gem. The tree is a very vigorous grower and should be planted on well-drained, good peach soil.

### **FROSTQUEEN (N. J. 185)**

A white-fleshed, freestone peach ripening about a week after Fallate, and at least two weeks after Elberta. An excellent white peach to follow Fallate.

## **NECTARINES**

### **NECTAROSE (N. J. 9)**

A large, white-fleshed freestone, ripening just before Garden State, or about with the Sunhigh peach.

## GARDEN STATE

A large, firm, yellow-fleshed freestone of high quality ripening with the Goldeneast peach. It is very desirable for slicing, canning, and freezing.

## NECTAHEART (N. J. 10)

A large, white-fleshed freestone completely shaded with red, ripening immediately after Garden State.

## NECTACREST (N. J. 8)

This large, attractive, white-fleshed freestone, usually ripens with the Summercrest peach at New Brunswick or about one week after Nectaheart.

## NECTALATE (N. J. 4)

This is the latest variety to ripen among all the nectarines offered by the New Jersey Peach Council. It usually ripens with the Afterglow peach, or nearly two weeks later than Nectacrest.

## LOW ACID PEACHES

**HONEYGEM**, yellow freestone. Few days after Elberta.

**NEWCHEER**, white freestone. Few days after Elberta.

## NUMBERED VARIETIES AVAILABLE IN LIMITED QUANTITIES TO NEW JERSEY GROWERS

### N. J. 137

A large, bright, yellow-fleshed peach ripening between Early East and Jerseyland. It is resistant to bacterial spot.

### N. J. 197

An attractive, yellow-fleshed peach ripening with Golden Jubilee. It is firmer than Golden Jubilee and the color is similar to Newday.

### N. J. 157

A large, firm, yellow-fleshed freestone ripening three weeks before Elberta. A good peach to follow Triagem.

## NEW JERSEY PEACH COUNCIL RECOMMENDED GRADES AND PRICES, FALL 1954 — SPRING 1955

Subject to change without notice.

GRADE	1 to 9 trees	10 to 24 trees	25 to 99 trees	100 to 249 trees	250 to 499 trees	500 trees and up

Trees may be secured at the C. H. Steelman Fruit Nursery on the Clarks-ville-Port Mercer Road, about one-quarter mile from State Highway Route 1. Telephone Princeton 1-2525. Small shipments to distant points, including all orders for less than 25 trees, will be sent by express collect unless otherwise specified on the order blank.

## PLACING ORDERS

All orders for trees should be sent to the New Jersey Peach Council, Inc., R.D. No. 3, Princeton, New Jersey. Orders for Fall delivery will receive first consideration.

A deposit equal to 10 per cent of the total cost of the trees is required with each order and the balance before delivery.
